KPIs & Why They Matter

Engagement Rate

Why it matters:

Engagement rate reflects how well your content resonates with your audience. Higher engagement (likes, comments, shares, saves) means that your content is not just being seen—but being valued. It's also a strong indicator of influencer authenticity and content quality.

How it helps Zepto:

Since Zepto is focused on organic growth, engagement helps assess which content pieces (Reels, YouTube Shorts, Tweets) drive genuine interaction, increasing visibility through platform algorithms.

Conversion Rate

Why it matters:

Conversion rate tells us how many users take meaningful actions after seeing the content—whether that's signing up, installing the app, or placing an order.

How it helps Zepto:

This metric directly reflects ROI from influencer marketing. It helps identify which stage (awareness, consideration, or conversion) is performing best and what type of content is leading to real sales or downloads.

Thank You For Trusting Us!

That's a wrap—now let's deliver impact faster than Zepto!
